It feels like home

The area in which you live in is a major factor to make you feel at home. Just entering the locality and your regular haunts and comfort zones make you think "It feels like home!"

With this in mind, remember to study the neighborhood well before buying a property. Is it safe? Does it have facilities like shopping and schooling? Are you likely to find likeminded people of your status in the vicinity? If you are a cultural buff, is there enough going on in the area? Answers to these questions will add value to your property and lifestyle, as time goes by. □
